

HYDROCLEAN

Anti-fouling system for numerical sensor NTU

- Automatic cleaning system for numerical sensor NTU
- Ultra-low power consumption for long term deployments
- Easy to install and simple to operate

Applications :

- Urban wastewater treatment
- Industrial effluent treatment
- Surface water monitoring,
- Sea water monitoring, fish farming, aquarium

The **HYDROCLEAN** is a mechanical wiper system designed to fit easily to the numerical sensor of **Turbidity NTU**. Using a regular gentle brushing action, the Hydro-Wiper keeps the optical window of the instrument clean from bio-fouling and other unwanted deposits such as mud.

The **HYDROCLEAN** system offers the following features :

- Ultra-low consumption for long term deployments,
- Brush design that has been extensively field proven in extreme conditions,
- On board self monitoring for reliable operation ; if the wiper arm is knocked in front of the instrument face, the wiper arm automatically moves to one side.

The system is coupled with a wiper control module integrated in a box which contain 6 alkaline battery for applications autonomous or in external mode of power supply 6 - 18 V.

Technical specification

Specification	
Wipe Interval:	User select (15, 30, 45, 60, 120, 180, 240, 300, 360 or 720 mins)
Clock Accuracy:	+/- 1 minute per year (0-40oC)
Power Supply:	6 x alkaline AA batteries
Power Consumption:	Quiescent, 0.02mA, ~80mA during a wipe
Deployment Endurance:	Wipe interval dependent. In excess of 4 months with a 120 minute wipe interval
Brush:	User replaceable
Battery Housing O-ring:	#142 (2 3/8" x 3/32")
Construction:	Passivated stainless steel, Acetal, Ertalyte
Wiper Shaft:	Multiple bearing support with quad ring seal
Depth Rating:	30 meters as standard
Cable:	EPDM jacketed cable between the wiper and battery housing (1 meter standard length)
Cable Entry:	Cable gland with strain relief, O-ringed puck and resin back fill

Options :

Cable:	Additional cable between the wiper and battery housing
External Trigger:	External trigger input to control the wipe operation

Wiper control housing

The wiper control housing contains:

- Batteries
- Control electronics
- On/off power switch
- Wipe interval select switch
- Diagnostic LED indicator.
